

Test and quality Technician for the aviation industry m/f (full-time)

Who are we?

Aeroworks is a young and dynamic, internationally operating manufacturer of high-quality components for the aviation industry with about 560 employees worldwide. Quality products are designed and manufactured both as standard and to OEM requirements. Modern design and communication resources are used to deliver optimal 'product-to-market' performance.

From our head office, located next to Highway A7 in Middenmeer, we design and sell metal and composite interior products for use in mainly commercial aircraft. Production facilities are located in the Netherlands, Thailand and Laos.

We offer a dynamic and stimulating environment in which you will be able to work within a diverse team close together with the Quality Assurance, R&D and production departments.

Who are we looking for?

Aeroworks is constantly developing itself to cope with the high-quality demands of our customers within the aviation industry and we are therefore looking for an enthusiastic Test and Quality Technician, who will strengthen our team in the Netherlands.

In this position you will be responsible to witness and perform various test and you will be the first line of support for the shop floor on quality issues. You are communicatively skilled in both English and Dutch, you are starting your career and have an education level of EQF 3-4 in mechanical engineering or similar.

Which tasks belong to this function?

- Performing and witnessing mechanical and burn tests in accordance with FAR- and ASTM-requirements
- Writing of test reports in English and proof reading reports written by colleagues
- Designing and building cycle and load test setups
- Preparing and checking applicable documentation like test plans and test reports
- Performing dimensional and visual checks of incoming goods and production parts
- Being responsible for the release of the Certificate of Conformity
- Being the first line of support to the shopfloor for all quality related questions
- Initiating and handling of non-conformances and occurrences
- Maintaining the calibrations and maintenance of the test and measuring equipment

Which competences do we require from you?

- A technical background and / or proven affinity with engineering
- Excellent oral and written communication skills both in Dutch and English
- 1-2 years of work experience

What do we offer you?

- Appropriate salary and terms of employment
- Working in the challenging aviation industry with a high focus on safety and quality
- Working in a dynamic and stimulating environment with a large variety in techniques and machinery
- Working in a young and internationally operating company with growth perspectives
- Working in a young and enthusiastic team
- Possibilities to develop yourself through taking courses and training
